

Physical Activity Policy

At Mansbridge Community Pre-School and Nursery we aim to promote the health and well-being of the whole setting through encouraging physical activity and providing consistent messages to children, parents and staff.

We are aware that children of all ages should be active. Being active is important for children under five because it helps them to build and maintain a good level of health; physical activity is essential for growth and development. Children under five need time to play and learn new skills; the early years are also an important time to establish good habits relating to physical activity.

We follow the guidelines set out by the Chief Medical Officer regarding how much physical activity children under five should be taking part in:

Children who are not yet walking

- Physical activity should be encouraged from birth, through floor-based play, reaching, grasping, rolling etc. Babies should also have 30 minutes tummy time everyday, spread throughout the day

Children who are confident walkers

- Children should be physically active for at least three hours throughout the day. For preschoolers, 60 minutes of this time should be moderate to vigorous activity.

Our nursery curriculum includes planning our indoor and outdoor activities. For children who cannot walk, we encourage movement through the use of treasure baskets and floor play which helps encourage children to reach and grasp.

More confident walkers use our outdoor provision frequently through the day including soft play for climbing. We ensure that the children have as much time outdoors as possible. Every day our babies, toddlers and Preschool children have designated exercise time in the school playground morning and afternoon to run, jump, scoot around on bikes and scooters or play with resources such as balls and windy day toys. We also have a sports coach deliver 1 hour sessions 4 times a week.

Physical activities are planned to ensure children are taught the skills they need as well as the children having child initiated, free-flow play. They are able to be creative with these resources in a stimulating and safe environment.

We conduct risk assessments, both internally and for off-site visits to ensure the safety of all the children in our care.

We minimise the amount of time children spend being sedentary (except sleeping time). This includes low-energy activities such as sitting or lying down which limits the child's opportunity to move.

All children, including those with special education need and disabilities (SEND) are entitled to a comprehensive programme of physical activities.

Our staff aspire to be positive role models for our children. We aim to take part in physical activity whenever possible, e.g. as part of practitioner sessions and sharing hobbies such as running, cycling, dancing etc. Alongside this, we join in when the children are doing physical activity at nursery.

All physical activity is in line with our Health and safety - general policy and Overall approach to risk assessments policy.

Use of any external personnel including sports coach will be in line with the Supervision of visitors policy.
